

Tapatan

(from the Philippines)

Materials: Game board; 3 counters of one color, 3 counters of another color.

Goal: Be the first to make three in a row of your color.

To Start: Take turns placing your pieces, one at a time, on any empty point (where lines connect) on the board until all 6 pieces are on the board. Don't let the other player get three in a row!

To Play: On each turn, move one of your pieces one space along a line to the next empty point. Jumping over a counter is not allowed. Only one player may occupy a point a one time. The winner is the first person to get three in a row of their color. You have a tie game if the same move is repeated three times. Have fun!
