Zingo's Zoo

On a school trip to Zingo's Zoo, Mary counted 10 <u>animal legs</u>.

How many animals did she see?

What could they be?

Find a way to show your thinking.

Other ideas to ponder…

Is there another possible answer?

If she counted 14 legs, what **animals** might she have seen?

If she saw 4 animals, how many **legs** might she have counted?
